## **TOWN OF NEWTOWN**

### **OFFICE OF THE FIRST SELECTMAN**

On Monday, June 4th, the Town of Newtown will begin its curbside pickup and removal of storm generated debris ONLY from the May 15<sup>th</sup> event. Any other debris is not FEMA reimbursable. It is our intention to complete this task within a three week period.

The five main affected areas already have contractors and crews scheduled. If you live on one of those streets you do not need to notify Public Works. To see if your street is listed as being in one of the affected areas [click here](#) to use the interactive map. To view a list of eligible roads, visit [www.newtown-ct.gov](http://www.newtown-ct.gov).

There are other areas of town where damage is more localized. If you are not listed as a scheduled road, file a work order request using “Storm Debris” as your request type. If there is a problem, call Public Works (203-270-4300). We will be taking work order requests for curbside storm debris removal until Friday, June 22<sup>nd</sup>. The size and amount of big wood may require our continuing efforts beyond June 22<sup>nd</sup>, but we want all requests on file by that date. We will not take “new” requests for curbside storm debris removal after this date.

The property owner is to place all debris to be removed within 10 feet of the curb. The debris is not to extend over the curb into the roadway. Roadway intersections and driveway site lines are “NOT” to be impaired by piles of debris. After all debris is removed, the roads will be swept and all storm water basins checked and cleaned as necessary.

Finally, as a matter of safety both for the residents and the crews that will be doing this work, all residents should keep at least 75’ or more away from all crews and equipment. Injuries may be caused by flying debris or distraction. We want to keep everyone safe during this operation and complete it as expeditiously as possible.
