Clays the Way!

Come play and learn about the properties of clay. We will be exploring a range of possibilities including the different techniques and methods used to hand build. Working with form, space, volume, texture, design and balance we will be developing our critical eye that helps us make informed choices. We learn to think like sculptors through deductive reasoning. We learn to look at form originally emerging from the material. Clay feels good! The experience of clay allows us to explore our sense of touch, sight, sound, and smell. In an era of digital technology, it is primary to come back to being directly connected to our hands in the molding process.

**Sculpture: Working in 3D**

Have fun learning to explore and investigate the art of sculpture using the Design Elements (Line, Shape, Form, Color, Texture, Pattern and Space), and design principles (balance, movement, contrast and emphasis). By using a variety of media such as cardboard, wire and more, we will engage directly with the hands on approach of the creative process solving problems and discovering possibilities, outcomes and surprises. Experimenting creates a focus and develops persistence through a trial and error process. We don't give up until we find a way that works! In a supportive setting, children will develop the confidence to take risks, and will value their own ideas and solutions as well as those of their peers. Remember learning to create is learning to see! There are no mistakes, only discoveries!

Drawing Mixed Media

Join Paint, Draw & More! Paint, Draw & More! offers fun classes that allow your child to express their creativity, while we teach them technical skills that help them blossom and build self-esteem through their artistic accomplishments. Our classes are fun, engaging and each project is developed with your child in mind. We teach young artists how to build an image vocabulary, and develop problem-solving skills through the medium of art. Whether your child continues in the arts, or chooses another path, this creative development will enhance their intellectual growth and understanding of math, history and the sciences. Drawing fundamentals like shape, contour, design, color and medium are progressively used every week so your child can create new and varied works of art they can be proud of and excited to share.

Aikido
Aikido will meet on Monday evenings from 7:15-8:30 and Saturday mornings from 9:15-10:30. We will have a somewhat flexible schedule due to travel. This is a mixed class of children and adults. Aikido is a gentle martial art that can be experienced and enjoyed by the whole family. The grace and power of Aikido comes from using the attacker's force to throw him/her with minimal effort. The Aikido principles of balance, blending and non-resistance teach students to seek creative alternatives to conflict, both physical and verbal. By training in a supportive, non-competitive atmosphere, students will learn and experience: useful physical skills such as rolling and falling safely; creative conflict resolution, body awareness and practical self-defense skills; enhanced coordination of mind and body; improved balance and coordination; increased self-confidence and self-discipline while having fun along the way. In a world increasingly filled with stress and conflict, the lessons of Aikido are useful tools for both children and adults. We are associated with Berkshire Hills Aikido in Great Barrington, MA. Adults and children 8 years and older are invited to experience this special art form. For more information please call (203)-364-1380.
